In January 2015, the official Roblox Studio 2 was released on Steam. It allowed for cross-platform development with Windows 10. However, any existing games made with the previous version (R-Engine) will not work with this new version since it uses a completely different engine.

Roblox is used for many educational purposes. For example, students can use it to practice basic coding skills such as the keyboard, the number keys, and how to move the characters on the screen. Teachers have also found it useful for teaching basic physics such as gravity and force. It's also used in STEM (Science, Technology, Engineering and Math) classes at elementary schools in which students have access to do robotics projects.

On July 29, 2016 (9:00 AM), ROBLOX released a new website design. This redesign was created in order to make the main site easier to navigate and find what they wanted at a faster pace. There are many new features that make the site easier to manage and update. There are many new pages and features added. The new page layout is designed with ease of use in mind.

The next game to have a monetary currency was Habbo Hotel where they introduced Habbo Coins which are used for buying furniture, clothing, and accessories. ROBLOX is the first major 3D based social network game. It would later be followed up by games like There in late 2015 and Toontown Online on September 26th of 2007. [118]

On September 10th, 2019, Roblox introduced a new 'Creative' game mode. It is an improved version of the current 'Build' mode where there are more blocks to build with and the ability to save your progress at any time.[105]
